NEW Dental chair SK1.08

from CHIRANA Medical, a.s. Stará Turá
– to be calmed naturally...

- New fashionable shape
 - New design: aluminium body of key parts with smooth shapes and durable surfaces
 - New head-rest: easy adjustment of the many different positions and levels. There is possibility of the electronic or mechanical lifting
 - New back-rest and seat: anatomically forming without any "undressing effects" with maximum comfort for your patients
 - New hand-rests: three options only up to you – 1) fixed, 2) tilting or 3) electronically controlled automatic movement together with up and down movement of chair
 - New functions: automatically programmed adjustment of 2 x 4 positions with visual control on display. Synchronised movement of back-rest and seat for highest comfort
 - New technology of upholstery – easy to disinfect and to clean
 - New safety: electronically controlled movement of back-rest and seat with ability to avert any collision of chair with sudden barrier
 - New anti-shock position: standard equipment includes very deep "Friedrich Trendelenburg's" position to bring maximum level of safety for your patients
 - New ergonomic solution: the chair is designed in several versions to be delivered separately or together with dental unit
- There is pre-prepared size for all energy inlets/outlets incorporation under chair to have one compact workstation in your surgery office
